Hospital Media & Applications

Patient Engagement & Interactive Healthcare Media Cloud Delivery Solutions

MEDITEL®
MEDIA STUDIO

Meditel Media studio is quickly setting the standard in the healthcare industry by offering innovative applications and features that have been specifically designed to deliver healthcare solutions to the patient bedside, to reduce hospital staff workload and improve patient care.

The Meditel Media studio makes it easy, quick, and convenient for hospital personnel to access health education, interactive medical and administrative applications which include Hospital Information, Bed & Room Maintenance Status, Electronic Medical Records, Dietary Meal Menus, Bi-Directional Patient Video Nurse Call and more.

These hospital centric multimedia interactive applications are un-parallelled in the industry and can be delivered to personnel in the patient room in long-term healthcare facilities, dialysis units, clinics and hospital environments.

The patient Electronic Medical Record (EMR) at the patient's bedside is being embraced by the medical community as a tool for enhancing the efficiency of healthcare delivery by improving healthcare interactions with patients.

Innovative Applications for Clinicians & Hospital Personnel at Bedside

**Large Screen TV Media Terminal & TV Remote Pillow Speaker
with Built-in QWERTY Keyboard**

User-friendly processes help transform hospital personnel tasks into an efficient dynamic state-of-the-art user experience. The media or data content can be viewed on a Bedside Touchscreen Media Terminal or a foot-wall mounted Large TV Media Terminal.
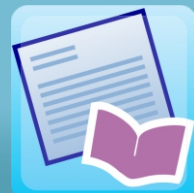

**Bedside Touchscreen TV Media Terminal with
Built-In VoIP Telephone & TV Remote**

Simple intuitive menu process with its easily identifiable icons, descriptive on-screen text prompts, oversized menu keys developed for both Touchscreen and Pillow Speaker processing, enables hospital personnel to navigate to their desired applications quickly and efficiently.

| Automated Service Transfers | Health Education | Follow-Up Questionnaire | Care Team Info | Patient Dietary Menu | Hospital Information | Electronic Medical Record (EMR) | Bed Status & Room Maintenance | Patient Tracking | PatientCam™ Video Nurse Call | Hospital Staff Training |
