

Computer Compatible Interactive TV Remote Pillow Speaker

Hôpital has developed an industry exclusive custom designed all in one multi-functional Medical Grade TV Remote Pillow Speaker with 4 modes of operation:

Designed to be compatible with Intelligent Hospital Grade LCD TVs to accommodate any application requiring keyboard data entry and Internet browsing.

- 1) TV Remote 3) QWERTY Keyboard
2) Audio Pillow Speaker 4) Computer Mouse

Advantages

- Multi-functional with 4 modes used as a TV Remote Control, Audio Pillow Speaker, QWERTY Keyboard and Computer Mouse
- Permanently installed in-patient room available 24/7, requires no power supply or human resource management
- Sealed to prevent contamination entering the remote which could spread from one patient to another
- IP54 Ingress Protection Rated as defined by the IEC standard 60529
- Designed and tested for use in an oxygen enriched atmosphere
- Provides clear sound at the bedside by reducing the ambient noise inside and outside the room
- Media-Centric color coded user interface design patterns with easily identifiable quick links
- Additional audio source integrated with audio input for disposable headphones use
- TV and keyboard toggle switch which easily transfers TV Mode to Keyboard Mode and vice versa with on-screen visual indicator that flashes during transitions
- TV Mode or Keyboard Mode indicator displayed on-screen in the patient user interface header
